DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-28 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1- 4, 14-16, 18-21, 23, 25-27 and 29-31 rejected under 35 U.S.C. 102(b) as being anticipated by Nadal (European Patent Number 0757904 A1).
4. Nadal discloses an intraluminal stent comprised of a plurality of circumferential hoops disposed in a helical succession along the axis of the stent wherein the hoops are comprised of elements defined by substantially straight struts connected by apex sections alternately pointing in opposite axial directions, the intraluminal stent further comprising connecting members between adjacent hoops wherein the hoops can be either directly connected or connected by means of a bridging member.
5. Nadal further discloses an intraluminal stent wherein an apex section comprises two struts attached thereto and one strut is longer than the other strut. See Figures 2, 3, 5 and 6.
6. Nadal also discloses an intraluminal stent wherein the apex sections are comprised of a uniform angle except for selected apex sections having a non-uniform angle, the non-uniform

angle apex sections configured to align a first strut with a second strut in an adjacent hoop. See Figure 8.

Allowable Subject Matter

7. Claims 5-13, 17, 22, 24, and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
